An Equal Opportunity Employer

Indiana's non-seasonally adjusted unemployment rate for November is 4.7 percent, six-tenths of a percentage point below the national rate of 5.3 percent, Craig E. Hartzer, Commissioner for the Indiana Department of Workforce Development, announced today. The number of Hoosiers employed during November 2001 was 2,988,600.

Indiana's November unemployment rate was lower than Illinois, 5.4 percent; Kentucky, 5.0 percent and Michigan 5.2 percent. Only Ohio was lower at 4.5 percent.

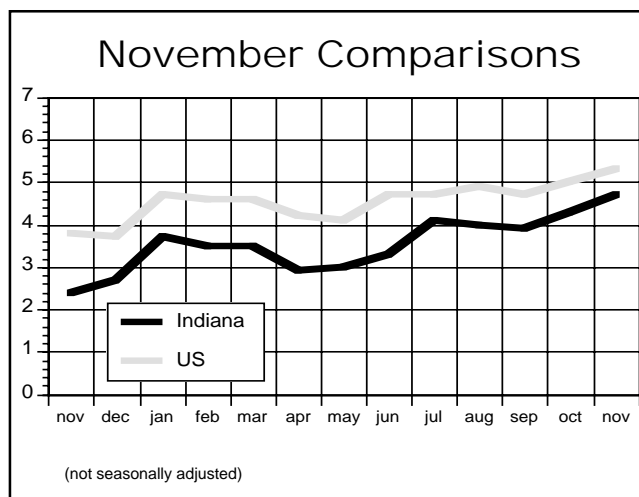

"The November numbers continue to show the impact of the recession on Hoosiers. We experienced employment gains in November in the service and trade sectors, but, we are still very concerned about the loss of good paying manufacturing jobs," commented Hartzer.

The monthly survey of 7,500 Hoosier employers reports payroll employment at 2,994,100, a decrease of 52,800 from one year ago and 2,400 less than last month. Payroll employment is an estimate of non-agricultural jobs in Indiana businesses. It differs from labor force employment which is used in the calculation of the unemployment rate by not including the self-employed and agricultural workers. In addition, payroll employment includes all those who work in Indiana, while the unemployment rate is calculated by those who live in Indiana.

Manufacturing employment totals 645,100 in November, a decrease of 35,800 from last year. Motor vehicle manufacturing accounts for 93,000 jobs, 7,200 less than one year ago. Manufacturing of motor vehicle parts totals 59,200. Industrial machinery manufacturing in November accounts for 68,000 Hoosier jobs, 1,000 less than October.

Construction employment totals 155,800 a decrease of 1,000 from last month. Of that, heavy construction reports 19,000 jobs, an increase of 300 from last year.

Service producing employment totals 2,187,200 in November, 16,100 less than last year. Transportation and public utilities total 144,500, 400 less than October.

(over)

Retail trade totals 569,500, 7,600 less than a year ago. Of that, general merchandise stores report employment of 88,700, or 3,600 less than last year. Service sector employment, such as business services, computer and data processing, totals 761,900 in November, which is 1,600 less than the previous year.

Indiana's estimated labor force (the number of people 16 years of age and older who are able and available for work) totals 3,134,600 in November

2001. An estimated 2,988,600 Hoosiers are employed and 146,000 are unemployed.

Indiana's labor force for November 2000 totaled 3,100,000. Hoosiers employed one year ago is estimated at 3,021,000, and November 2000 unemployed in Indiana totaled 79,000. Indiana's estimated unemployment rate one year ago was 2.5 percent, compared with the national unemployment rate of 3.6 percent in November 2000.*

*Due to an expansion in the Current Population Survey (CPS), mandated by Congress, estimates for June 2001 (revised) and later at both the state and substate levels may not be fully comparable with those of earlier periods. In analyzing data, be aware that over-the-year comparisons, may differ slightly from comparisons that would have been made using data without the sample expansion. More detailed information can be found at <http://stats.bls.gov/launews1.htm>.

Industry Payroll Employment

Selected Categories	November-2001	Change from October 2001	Change from 2000
